TITLE : PORTABLE PHONE TERMINAL WITH
OCR(OPTICAL CHARACTER
RECOGNITION) FUNCTION

ABSTRACT : PROBLEM TO BE SOLVED: To provide a means capable of inputting printed information of a character and a symbol such as an address, a name and a phone number on a portable phone terminal by a simple input operation in a quick and sure way.

SOLUTION: The present invention converts the character and symbol contained in image information captured by an image capturing part a of 2 fitted to a portable phone terminal body 1 to character information and symbol information by an OCR function provided to the portable phone terminal body 1 or the image capturing part a of 2, allowing the printed address, name and phone number to be entered to the portable phone terminal. Furthermore, on an Internet-connectable portable phone terminal, a desired homepage or server can be accessed by entry of a printed URL by the above means.
